

EXPERT LECTURE

A series of expert lectures were conducted on “[Introduction to Machine Learning](#)” by Prof. Vivek Vijay (IIT Rajasthan, Jodhpur) was held on 7th & 8th of October, 2010.

The lecture was attended by students of III & IV year CE and IT branch.

[On day 1](#): Prof. Vijay started his lecture with the introduction to machine learning, he also discussed the differences between training errors and generalization errors and various applications based on it.

[On day 2](#): Prof. Vijay discussed hypothesis used in machine learning algorithms and also talked about supervised and unsupervised learning’s in AI based networks. He gave mathematical proofs on linear hypothesis functions and told the students how to generate hypothesis-function for an application.

Moreover, lecture series was very beneficial and very informative and many staff members along with students got benefitted by it.
